India | Colossal Growth Opportunity

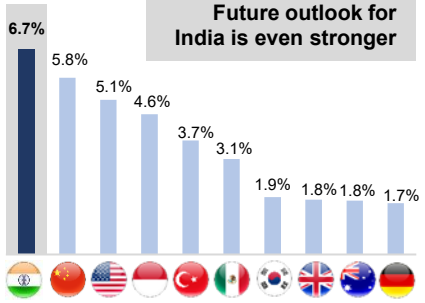

Key Highlights:

- India's real GDP grew at **7.1%** in FY25 & is estimated to grow at **7.6%** in FY26.
- India's target to be a **developed economy by 2047**: **~$35 Tn GDP** with 10-11% nominal growth rate
- With **rapid urbanization** and **rising consumption**, **Indian Infrastructure** is at the cusp of **multi-decade super cycle.**

Fastest growing economy + large consumer base….

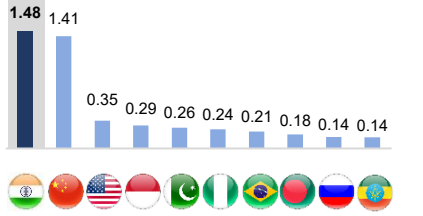

Fastest Growing Large Economy
G20 Real GDP CAGRs, 2014 to 2024 (%)

Future outlook for India is even stronger

Large Consumer Base
Top 10 Countries by Population (in Billion), 2026

India has largest consumer base in the world

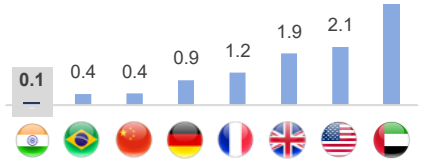

India Economic Growth + Large Consumer Base → Airports, Roads, Digital

…needs critical infra in transport and logistics

Under penetration of Air Travel
Annual air trips per capita, IATA, 2023

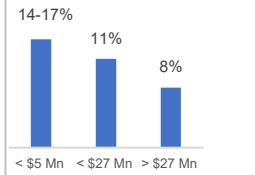

Exponential growth opportunity to serve Indian Consumers

As Indians shift to air travel, airports biggest beneficiary

High logistics cost
Logistics spends as a % of Output by Firm-Size

Transportation accounts for ~ 60% of direct logistics costs

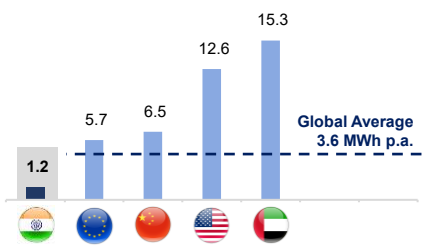

Core Infra Investments & Last Mile Connectivity will drive long term logistics cost efficiency

Scaled Road network to drive lowering of logistics cost

Decarbonisation & Atmanirbhar bharat is the focus..

Electricity Consumption to Grow
Electricity consumption per capita (MWh p.a.)

India is ~1/3rd of global average

Explosive growth in power generation, transmission and distribution sectors

Decarbonisation Drive and Focus on reducing CAD

Key highlights

Key business update: FY26

Airports

- Pax movements **95 Mn, 1%** YoY
- **Greenfield Navi Mumbai International Airport commenced operations from 25th December 2025**, a major landmark in India's aviation journey

ANIL

- During the Q4, Domestic Solar Module sales surge 95% to 1459 MW on Y-o-Y basis
- ANIL Wind division started supply of 3.3 MW WTG model, 51 sets supplied during the year

Roads

- **AEL operationalizes one project** during Q4, now have ten operational projects
- Added three new projects during Q4 including one HAM and two TOT projects in Bihar, Tamil Nadu and Gujarat

Data Center

- During the Q4, **358 MW order signed** with hyperscale customer for Hyderabad
- **Total operational capacity is 55+ MW** from four data centers

Rating Rationale – Key highlights

- **AA-/Stable** (LT) & **A1+** (ST) by ICRA and CARE
- Successful completion of AEL Right Issue raising ₹24,930 cr, sees oversubscription by 30% from market
- Building strong franchise for public debt market with disciplined NCD issuances
- Strong operating performance led by Airports
- Strong balance sheet & Improved liquidity position

Cash PAT : PAT + Depreciation

FY 25 numbers restated.

AAHL: Market Outlook - India is the fastest growing aviation market in the world

India – Fastest growing aviation market over the last decade…

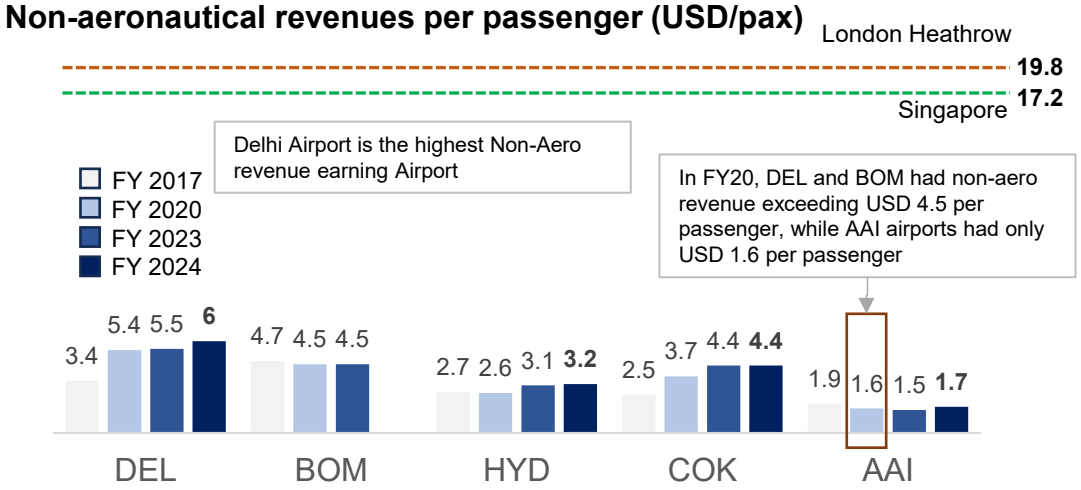

…with strong indicators of future growth

CAGR (2018-40) – Top 10 fastest growing Asia Pacific aviation markets by pax

1. Vietnam	2. India	4. Philippines	5. Indonesia	9. China	10. Malaysia
6.2%	6.1%	5.3%	5.2%	4.7%	4.4%

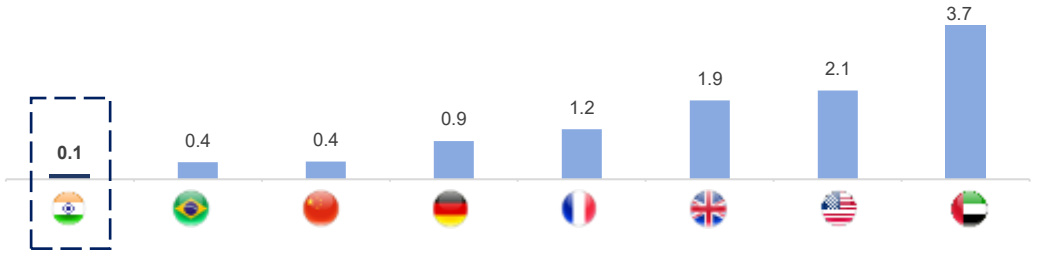

- India remains **one of the least penetrated aviation market** in the world
- **Asia Pacific** is poised to be the top contributor **~37.3%** of the world-wide traffic growth
- **India** is estimated to grow at the **second highest CAGR of 6.1%** during 2018-40

Private Airports Successfully Augmenting Non-aero Revenues

Huge Potential Due to Current Under-penetration

Trips per capita

Explosive growth projected in underlying air traffic driven by the economic growth and under penetration compared to comparable peers

Source: As per CAPA India Research and Analysis 2023 report, Airport Council International, CARE Edge Industry report on infrastructure, utilities and consumer sectors
CAGR: Compound Annual Growth Rate | **DEL:** Indira Gandhi International Airport | **BOM:** Chhatrapati Shivaji Maharaj International Airport | **HYD:** Rajiv Gandhi International Airport | **COK:** Cochin International Airport | **AAI:** Airports under AAI Management

AAHL: Commercial Model

Passengers

- Landing Fees
- Parking Charges
- User Development Fee
- Aerobridge charges
- Unauthorized Overstay

Non- passengers

- Duty Free / Duty paid
- F&B
- Lounges
- Advertisement
- Car parking

City Dwellers

Long term sub-lease on land co-terminus with airport concession

Aero Business

Regulated Revenue

- Organization Structure with capability of dealing with various regulators across businesses
- RAB Planning
- Route Development
- Ground Handling
- Fuel Farm

Non-aero Business

Unregulated Revenue

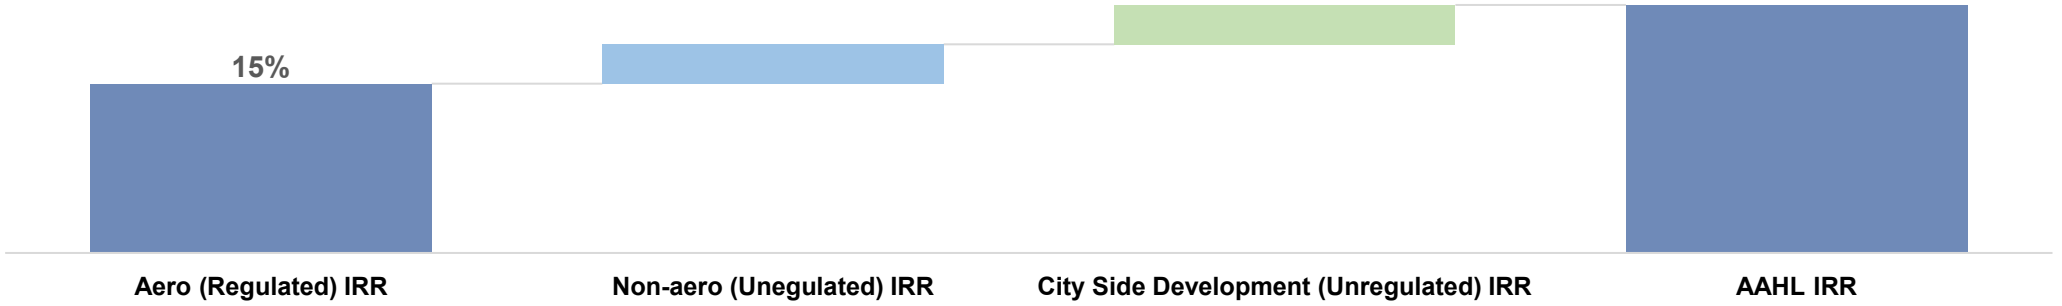

- Terminal Development
- Passenger Flow Optimization
- Digital Architecture
- Consumer Specific Strategy
- Cargo Handling[1]

City Side Development Business

Unregulated Revenue

- Hospitality
- Healthcare
- Commercial
- Integrated Real Estate Development Strategy
- Multimodal connectivity

Revenue streams offer twin advantage of rate of return model and consumer / real estate upside

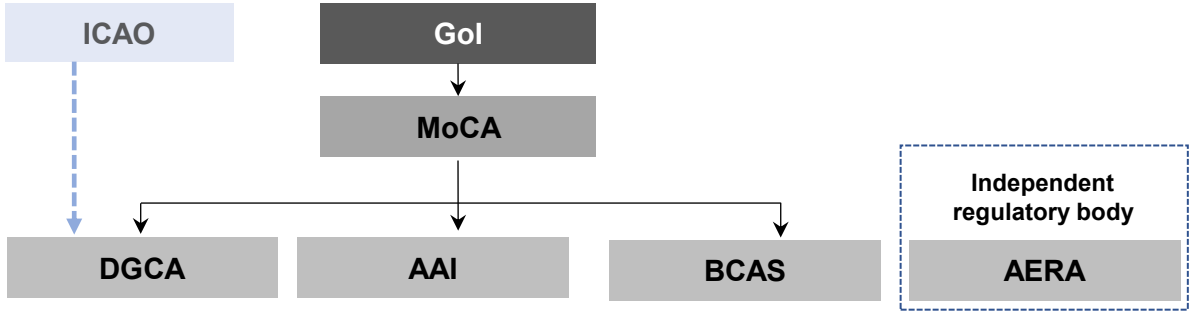

[1] Cargo Handling classified as Non-aero business for Mumbai and Aero-business for Ahmedabad, Lucknow, Guwahati, Mangaluru, Trivandrum and Jaipur as per Concession Agreement

IRR: Internal rate of return | **RAB:** Regulated Asset Base

AAHL: Stable and mature regulatory framework

Regulatory Set up

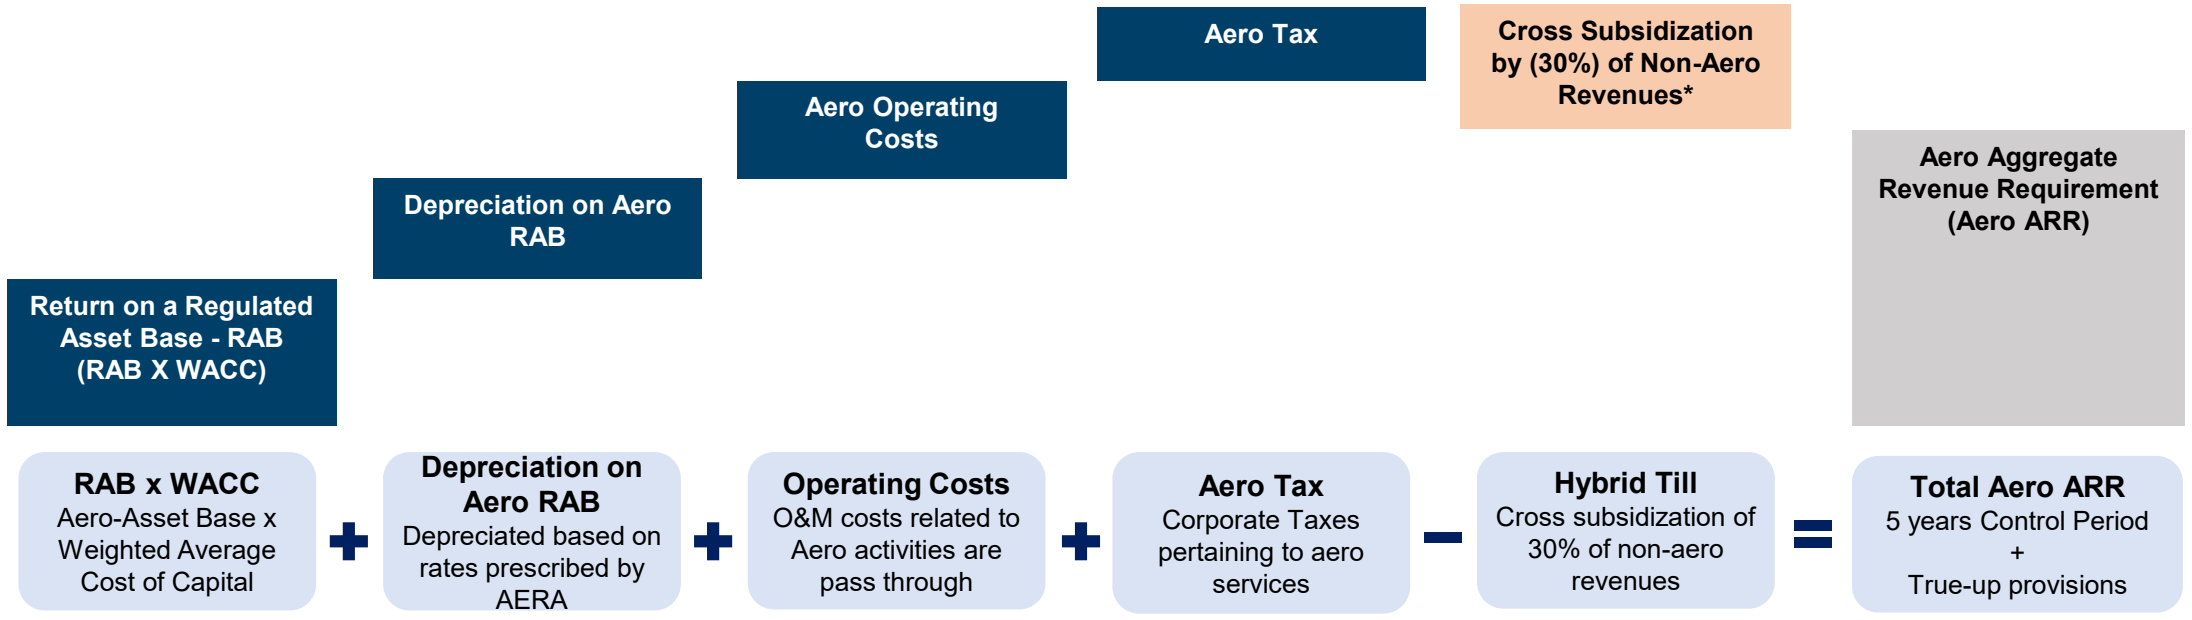

Well-Defined Model Regulatory environment has evolved to become more mature and efficient

Matured and well-defined Tariff setting process, **stakeholders are consulted** throughout to ensure buy-in

New concessions address issues faced in earlier concessions

Typical **control period** is for 5 years

Aero ARR

Adani Airports operate in an evolved regulatory framework, under which AERA has setup tariffs for all major airports

ICAO: International Civil Aviation Organization | **GoI:** Government of India | **MoCA:** Ministry of Civil Aviation | **DGCA:** Directorate General of Civil Aviation | **AAI:** Airports Authority of India | **BCAS:** Bureau of Civil Aviation Security | **AERA:** Airports Economic Regulatory Authority | **RAB:** Regulated Asset Base | **WACC:** Weighted Average Cost of Capital | **ARR:** Aggregate Revenue Requirement

AAHL: Aeronautical Business - Deep Dive

Focused on route development and stakeholder management to sweat airport assets to the fullest

Capacity Creation	▪ De-bottlenecking and capacity expansion ▪ Focus on **smart planning** of airside and **terminals** ▪ Leveraging group's **execution excellence**
Asset Utilization	▪ Shifting of Peak Hour by "Head & Shoulder Strategy" ▪ **Tech enabled operations** ▪ **Premiumization** of route mix ▪ Leveraging platform **network strength**
Customer Experience	▪ **Tech enabled maintenance** to ensure maximum uptime ▪ Sharp focus on ensuring highest **operating metrics** ▪ Creating transparency for customers

1. **Long term economic alignment with all stakeholders**
2. **Ensuring regulatory rate of return on assets created**
3. **Generating brand value by efficient planning and operations**
4. **Driving higher non-aero revenue growth by sweating capacity**

Safety | **Security** | **Sustainability**

Yield Planning

Capex planning to work cohesively with tariff rate strategy to ensure sustainable long-term tariffs

AAHL: Non-Aeronautical Business - Deep Dive

Non aero strategy designed to increase footfalls & provide high quality services through strategic partnerships with reputed 3rd parties

Increase Penetration

- Develop new channels for sales (airport e-commerce)
- Anticipating consumer wants
- Reduce anxiety across consumer journey

Increase Area for Monetization

- Focus on increasing area for monetization both within & outside terminal
- Terminal Extension to increase commercial footprint

Widen consumer base

- Develop options for non- passenger sales
- Create hub to extend to individuals and enterprises
- Channels to rethink customer from cloud to curb
- Expand beyond the airport

Increase Average Transaction Value

- Engage with consumer at every touchpoint
- Introduce exclusive brands to deliver high value
- Leverage digital and data to upsell/ cross sell

- Walk-through **stores,** product offering & placement
- **Strong JV Partner** with technical knowledge
- **Sourcing synergies** for improving margins

- Facelift of **Lounge infrastructure**
- **Integration digital platform** to enable lounge shopping

- Introduction of **concepts around localized flavors**
- **Network synergies** to introduce premium brands
- **Cloud kitchen** for optimal usage of space/services

- **Collaboration with partners** for customized offerings to **high end consumers**
- **Specialized concepts** for F&B and retail catering to HNIs

- Dynamic & **experiential concepts** for immersive experience
- Creative ideation to introduce **product placement**
- Economies of scale due to operations across 8 airports

- **Dynamic pricing** to maximize slot utilization
- **Automated solutions** for operational efficiency
- Complete digital solution for easy access and usage

AAHL | Planned Privatization of New Airports presents an attractive Growth Opportunity

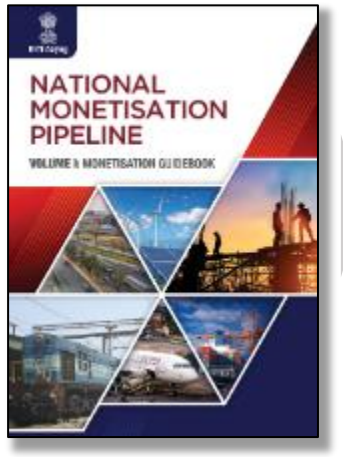

- Government of India has launched a National Monetization Pipeline (NMP) for monetization of brownfield infrastructure assets of aggregate value of INR 6 Lakh Crore
- As part of NMP, 24 AAI airports have been earmarked for monetization by government over 2025 to 2027
- Bundling of smaller airports with major airports for scale offering an attractive package for potential bidders
- Upcoming Airports expected to come up for privatisation under PPP model in near term

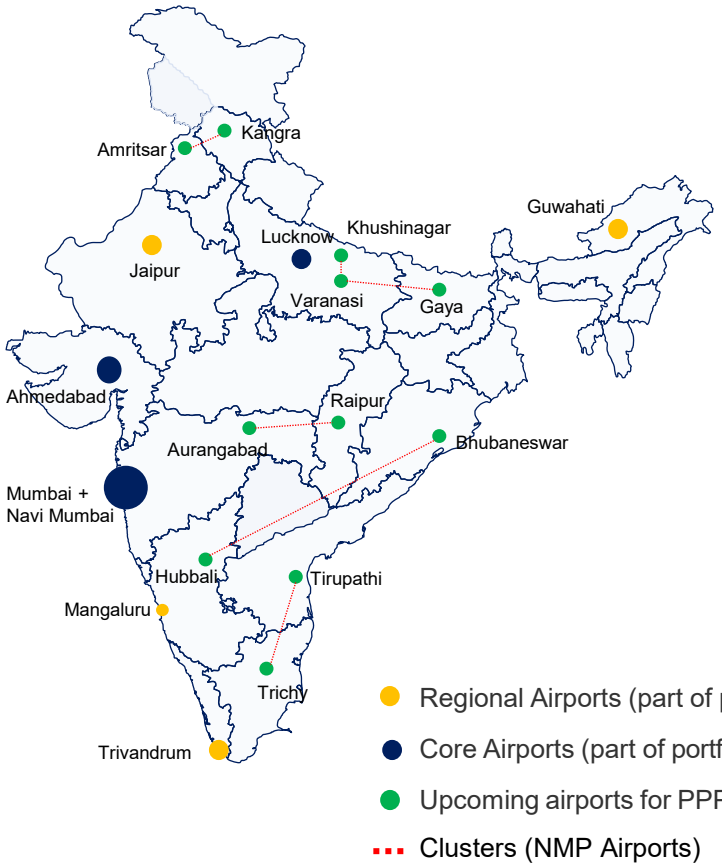

National Monetization Pipeline[1]

24 major AAI airports in Tier 2 & 3 cities have been earmarked for privatization

24
Airports
Upcoming for bidding

46m
Passengers
Handled in FY25 at the 24 Airports

Major Airports

Airports	MPPA[2]
Bhubaneshwar	3.7
Amritsar	4.8
Varanasi	3.9
Raipur	2.6

Transport and Logistics Business

Roads: Adani Road Transport Limited ("ARTL")

Adani Roads Transport Limited ("ARTL"): Overview

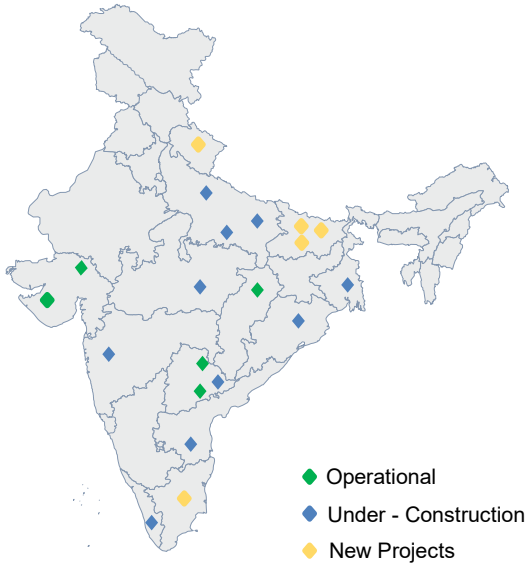

Emerging Leader in Roads Infrastructure

- ARTL has successfully developed a portfolio comprising 20 road projects(including a ropeway project) encompassing HAM, BOT, and TOT models, totaling 5,500+ lane kms
- Marks a major infrastructure milestone with the inauguration of India's largest greenfield Ganga Expressway project on 29 April 2026 in a record time of less than 3.5 years
- In addition to roads portfolio, ARTL also has a concession to operate and maintain 24 border check posts in the Maharashtra, India.

Business Model

	HAM	BOT	TOT
Description	EPC + BOT	DBFOT	User Fees/ tolls on highway stretches
Revenue	Annuity	Toll Collection/ Annuity	Toll Collection
Funding by Developer	60% of BPC	100% of BPC	Concession fee + Augmentation Cost
O&M Risk	Developer	Developer	Developer
Revenue Risk	Authority	Toll: Developer Annuity: Authority	Developer

Energy and Utility Business

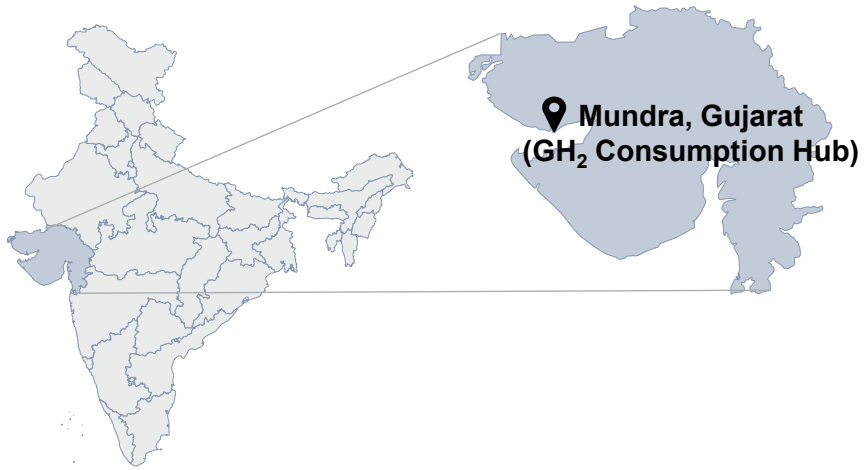

Green Hydrogen: Adani New Industries Limited (“ANIL”)

Adani New Industries Limited ("ANIL"): Overview

Frontrunner in India's GH_2 Revolution

- RE Manufacturing, H_2 generation and Downstream products will result in a fully integrated **Green Hydrogen ecosystem**
- **Fully integrated manufacturing and consumption** to result in lower wastage, faster turnaround, lower inventory, savings in overheads **improving cost efficiency**
- Target is to utilize the **cheapest green power** to generate the **cheapest green hydrogen**
- **Renewable Energy generation site in Gujarat** with potential of ~41 GW with high wind and solar resource
- **Mundra as an ideal green Hydrogen and manufacturing ecosystem** due to fully developed site & utility infrastructure.

One of the World's largest GH_2 Hub

Target Manufacturing Capacities

10GW per annum
Solar Cell & Module
4 GW Operational

4GW per annum
Wind Turbines
2.25 GW Operational

5GW per annum
Electrolyser
Under Development

~2.1 MTPA
Green Hydrogen
With potential to produce Green Ammonia, Green Urea, Green Methanol

Business Segments

Supply Chain Products Manufacturing

Solar Manufacturing
- Full backward integration starting from silicon to modules
- High efficiency future technologies – TOPCon & HJT
- Ancillary: Tracker, EVA, Glass etc.

Wind Manufacturing
- Manufacturing Turbine, Nacelle & Rotor Blades
- Technology partnership with renowned global players

Electrolysers
- 300 MW manufacturing capacity awarded under PLI
- Focused on reduction in stack & BOP cost through indigenization and scale

Green Hydrogen Generation

Integrated RE and H_2 Electrolyser Projects
- Renewable Power generation to power H_2 electrolyser
- Part of H_2 will go into downstream products
- Integrated project connecting to Mundra with a H_2 pipeline

Downstream Products

Large scale downstream anchor projects at Mundra, Gujarat
- Focus on Ammonia and Urea

Key Financial Metrics (FY26)

ANIL has commissioned **India's first off-grid 5 MW Green Hydrogen pilot plant** marking a major milestone in the nation's clean energy transition

Cr: Crores | **GH_2:** Green Hydrogen | **RE:** Renewable Energy | **H_2:** Hydrogen | **GW:** Gigawatt | **MTPA:** Million Tonnes Per Annum | **WTG:** Wind Turbine Generator | **RE:** Renewable Energy | **m:** million | **EBITDA:** Earning before Interest, Tax Depreciation & Amortization

03a(i)

ANIL: Manufacturing

ANIL: Green Hydrogen Manufacturing Ecosystem – Overview

Mundra Electronic Manufacturing Cluster

Ancillaries: Glass/Frame/EVA etc.

Common Utility Infrastructure

Consumables: Argon/H_2/HF etc.

Talent

Critical ancillaries are co-located in the same ecosystem for supply-chain efficiency & reliability

- **650 acres (263 Ha)** land exclusively ear-marked for IT/Electronic Investment
- Basket of Fiscal & Non-fiscal incentives are available to electronic manufactures interested to invest in this cluster
- The cluster is well supported by infrastructure and logistics facilities

Solar Manufacturing

- **4 GW per annum of Cell & Module manufacturing capacity** is operational of which 2 GW TopCon & 2 GW MonoPerc.
- Module sales continued at run-rate of 1 GW per quarter, 1,459 MW domestic sale during quarter up by 95%
- Module sales during FY26 is 4,904 MW up by 15% YoY basis
- **Construction of additional 6 GW p.a. Cell and Module manufacturing capacity progressing as per schedule.**

Wind Manufacturing

- Capacity increased to 2.25 GW from 1.5 GW.
- India's largest turbine: **5.2 MW WTG model** is India's largest machine in terms of rated MW capacity, offering highly competitive annual energy production.
- Offering of four WTG models including two of 5.2 MW and one each of 3.3 MW and 3.0 MW.
- Supplied **231 sets during FY26**, up by 41% YoY basis, including commencement of 3.3 MW of sets (51 sets).

Electrolyser

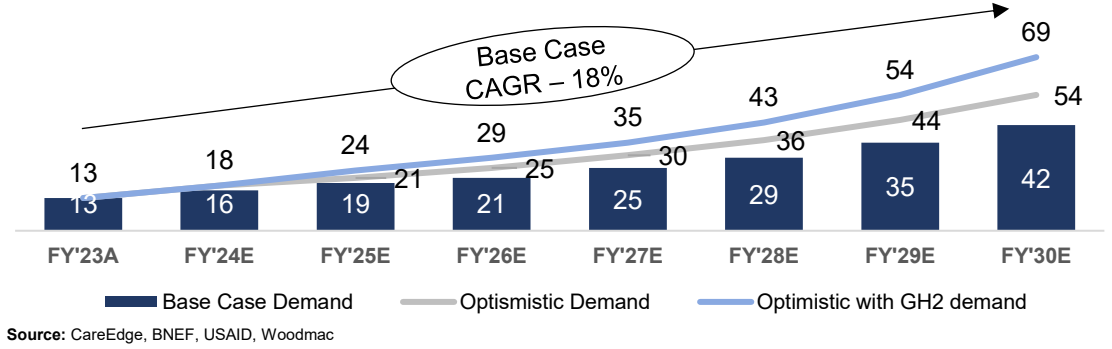

- Aggregate manufacturing capacity of **5 GW per annum** to be set up
- Received LoA from SECI to set up manufacturing capacity of 300 MW
- Technology development and testing completed for 25kW prototype based on CRT design and assembly in progress for 85kW prototype based on HyDEP design

ANIL has commissioned **India's first off-grid 5 MW Green Hydrogen pilot plant** marking a major milestone in the nation's clean energy transition

kW: kilowatt | **EVA:** Ethylene Vinyl Acetate film | **H_2:** Hydrogen | **TopCon:** Tunnel Oxide Passivated Contact | **MonoPerc:** Monocrystalline solar cells | **PEM:** Polymer Electrolyte Membrane Electrolysis | **Ha:** Hectares | **WTG:** Wind Turbine and Generator | **LoA:** Letter of Award | **SECI:** Solar Energy Corporation of India | **kw:** kilowatt | **CRT:** Cavendish Renewable Technology

ANIL: Market Outlook - Wind & Solar manufacturing demand driven by India's rapid energy transition

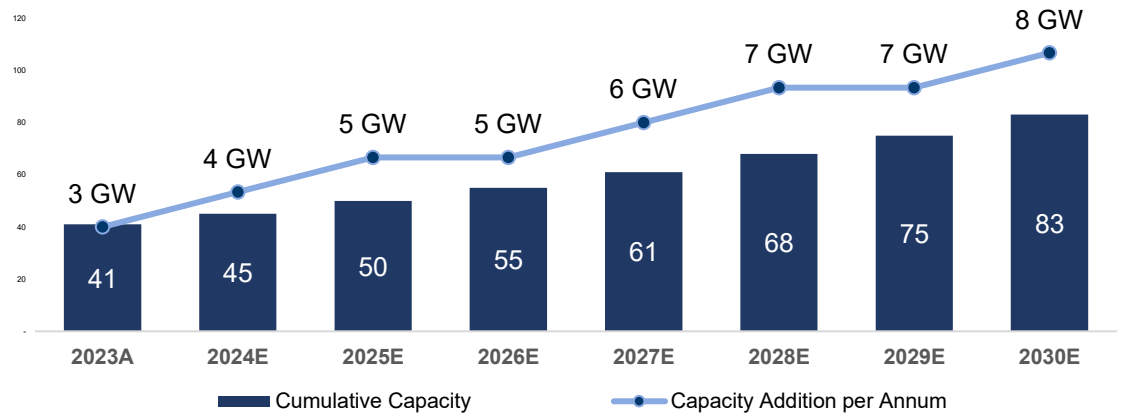

Annual India Solar Installation Forecast (GW)

Source: CareEdge, BNEF, USAID, Woodmac

Addition of green hydrogen demand will further enhance the annual installations (by ~ 6 GW/annum on average)

Annual India Wind Capacity Addition Forecast (GW)

Indian Manufacturing Market Drivers

Government of India has set a target of 500 GW of Renewable Energy by 2030 (300 GW - Solar & 140 GW – Wind)

Policy Support for Solar Manufacturing:

- Production linked incentive (PLI-1 & PLI-2) for Polysilicon, Wafer, Cell & Module and various Capex subsidy from Central and State Government.
- Government has been promoting the domestic solar PV manufacturing industry by implementing various policy measures like DPIIT[1], renewable players to procure modules from ALMM suppliers, various other offtake schemes like CPSU, KUSUM and Rooftop Solar.
- Government has levied custom duty of 44% (BCD of 40% & cess 10%) on modules and 27.5% (BCD of 25% & cess 10%) on cells to promote domestic manufacturing (effective from 1st April 2022).

Policy Support for Wind Manufacturing:

- Bidding with tariff pooling with wind-specific RPO from 29.91 % (FY24) to 43.33% (FY30).

[1] Department of promotion of industry and internal trade (Public Procurement section) Order NO. P-45021/2/2017-PP(BE-II) Dated 4th June 2020.

DPIIT: Department of Promotion of Industry and Internal Trade | **ALMM:** Approved List of Models and Manufacturers | **CPSU:** Central Public Sector Undertaking | **KUSUM:** Kisan Urja Suraksha evam Utthan Mahaabhiyan | **BCD:** Basic Custom Duty | **GOI:** Government of India | **MNRE:** Ministry of New & Renewable Energy | **PV:** Photovoltaic | **PLI:** Production Linked Incentive

Repowering opportunities

States like Gujarat & Tamil Nadu

ANIL WTGs have an Edge in the Market

India's largest turbine: 5.2 MW WTG is India's largest machine in terms of rated MW capacity, offering highly competitive annual energy production

Cost competitiveness: Domestic production of WTG has led to cost competitiveness because of low labour and materials costs. It is also rated among the Best Turbines of the year by Windpower Monthly's Turbines of the Year Award for 2023

Sufficient & flexible manufacturing capacity to cater to the market: Capacity has been expanded to 2.25 GW in FY25 and will be enhanced up to 4 GW per annum by FY27

Market is focusing on simplification of product portfolio and ANIL is manufacturing 5.2 MW WTG suitable for medium & high wind speed sites

WTG: Wind Turbine Generator | **SECI:** Solar Energy Corporation of India | **IPP:** Independent Power Producers | **AGEL:** Adani Green Energy Limited | **ACL:** Adani Cements Limited | **APSEZ:** Adani Ports and Special Economic Zone Limited | **MW:** Megawatt | **GW:** Gigawatt

03a(ii)

ANIL: Green Hydrogen

The Game Changer

ANIL: What is Green Hydrogen and Why is it Relevant?

- Hydrogen is crucial in a **net-zero energy system**, enabling decarbonization in hard-to-abate sectors
- Hydrogen can be used as an energy vector (produced, stored, and transported as a means of delivering and/or storing energy) in many hard-to-decarbonise sectors, where other energy vectors (e.g. electricity) are not suitable
- Low carbon hydrogen is either **Blue or Green H_2**, with Green H_2 being the lowest emissions and hence most suitable. **Cost of Green H_2 is determined by cost of green power, and scale of the project**

Global Hydrogen Market - Grey vs. Blue vs. Green

Types of Hydrogen

	GREY	BLUE	GREEN
Process	Reforming or gasification	Reforming or gasification with CC	Electrolysis
Energy Source	Fossil Fuels	Fossil Fuels	Renewables
Emissions from Production (CO_2 / kg)	Reforming 9-11 ! Gasification 18-20	0.4-4.5 !	Nil ✓

What Makes Green Hydrogen Relevant?

Hydrogen as a Strong Substitute for Traditional Fuels

Zero Emissions
No greenhouse gases or pollutants as a by-product

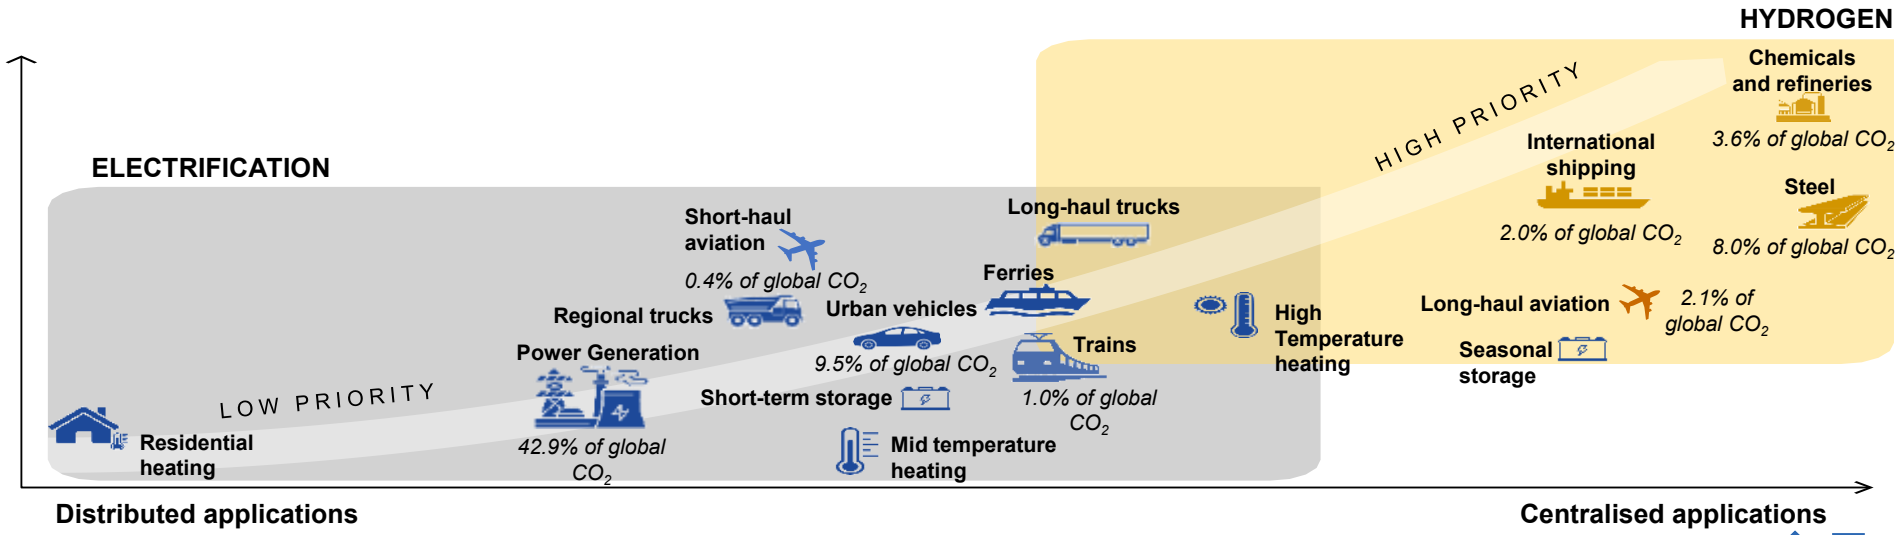

High Energy Density
Efficient fuel for long-range and high-power requirements

Decarbonisation of Hard-to-Abate Sectors
Ability to decarbonise sectors like heavy industry (steel/cement) and long-haul transportation

Versatility
Used in replacing natural gas transportation & power generation

Scalability
Can be produced at scale through renewable energy

Hydrogen Demand: Use Cases for Hydrogen

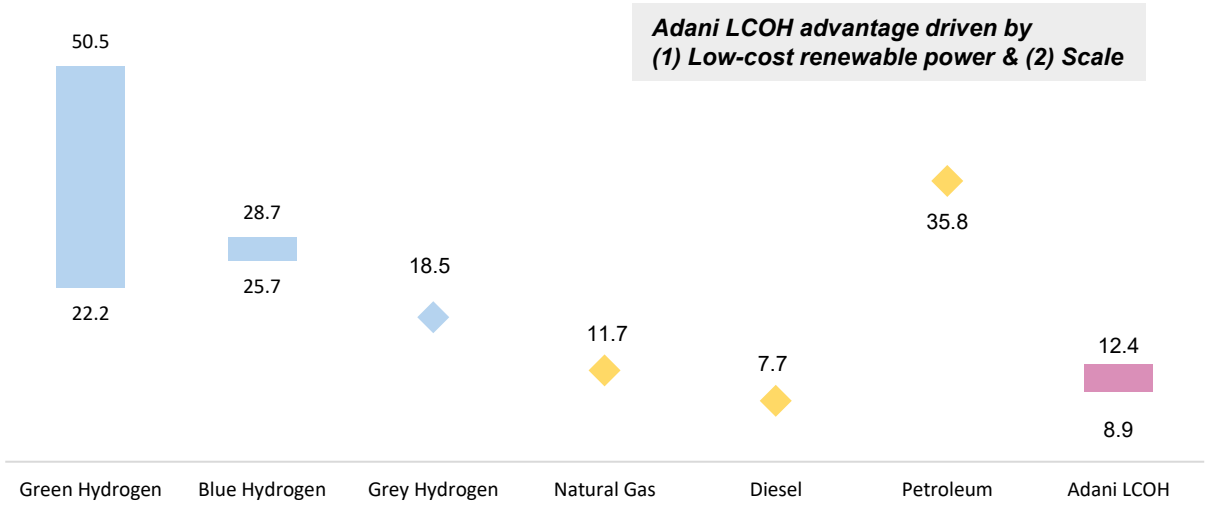

Sources: International Renewable Energy Agency, Bloomberg New Energy Finance, IDEA, Our World in Data
H_2: Hydrogen | **CO_2:** Carbon Dioxide

ANIL: Adani's Unique Value Proposition to Capture the Hydrogen Market

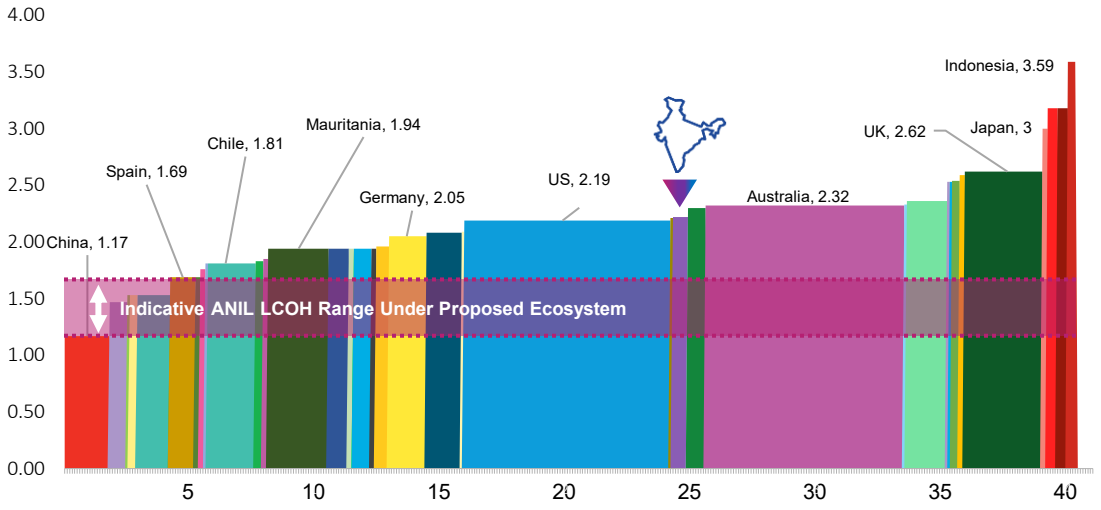

- Adani's fully-integrated green hydrogen ecosystem with complete supply chain control will produce **H_2** at a fraction of the cost of other domestic/ global players
  - ✓ Adani's Hub in Gujarat has an **immense renewable potential of c.40GW of solar and wind power alongside site readiness**
  - ✓ The identified site is located close to **Mundra SEZ**, a fully developed utility scale infrastructure site, which will serve as an ideally positioned hydrogen manufacturing ecosystem with existing and well-developed supporting pipeline infrastructure
  - ✓ ANIL will also ensure supply chain assurance by way of solar, wind and electrolyser manufacturing located in Mundra

Adani will have full visibility on the entire cost stack, internalising margins, and producing H_2 at an LCOH that is cost-competitive with fossil competitor fuels, capturing first-quartile H_2 merit and further accelerating the adoption of green fuels, with exponential ability to capture volume share

India Hydrogen 2023 LCOH vs Current Commodity Prices & ANIL Hypothesized Price LCOH (US$ / MMBtu)

Global Green Hydrogen Merit Curve, 2030 (US$/Kg vs Mt)

Sources: Bloomberg New Energy Finance, Delhi market prices, EH2 Analytics Suite
H2: Hydrogen | **GW:** Gigawatts | **SEZ:** Special Economic Zone | **LCOH:** Levelized cost of Hydrogen | **MMBtu:** Metric Million British Thermal Unit | **Mt:** Metric Tons

ANIL: Why will Adani Succeed?

Adani's control of its' input cost and access to the Mundra site have removed the principal cost variables and ensure the lowest cost H2 production in India, representing first quartile primary energy

Controlled cost of renewables capex → **Best in class O&M and renewable sites leading to lowest renewable LCOE in India** → **On-site electrolyser eliminated transmission capex** → **GH_2 LCOH for Adani lower than national GH_2 LCOH** → **First Quartile Primary Energy for India**

Adani has a Fully-Integrated Green Hydrogen Ecosystem with Complete Supply Chain Control

Existing Supply Chain Products Manufacturing Business

Downstream Hydrogen Business

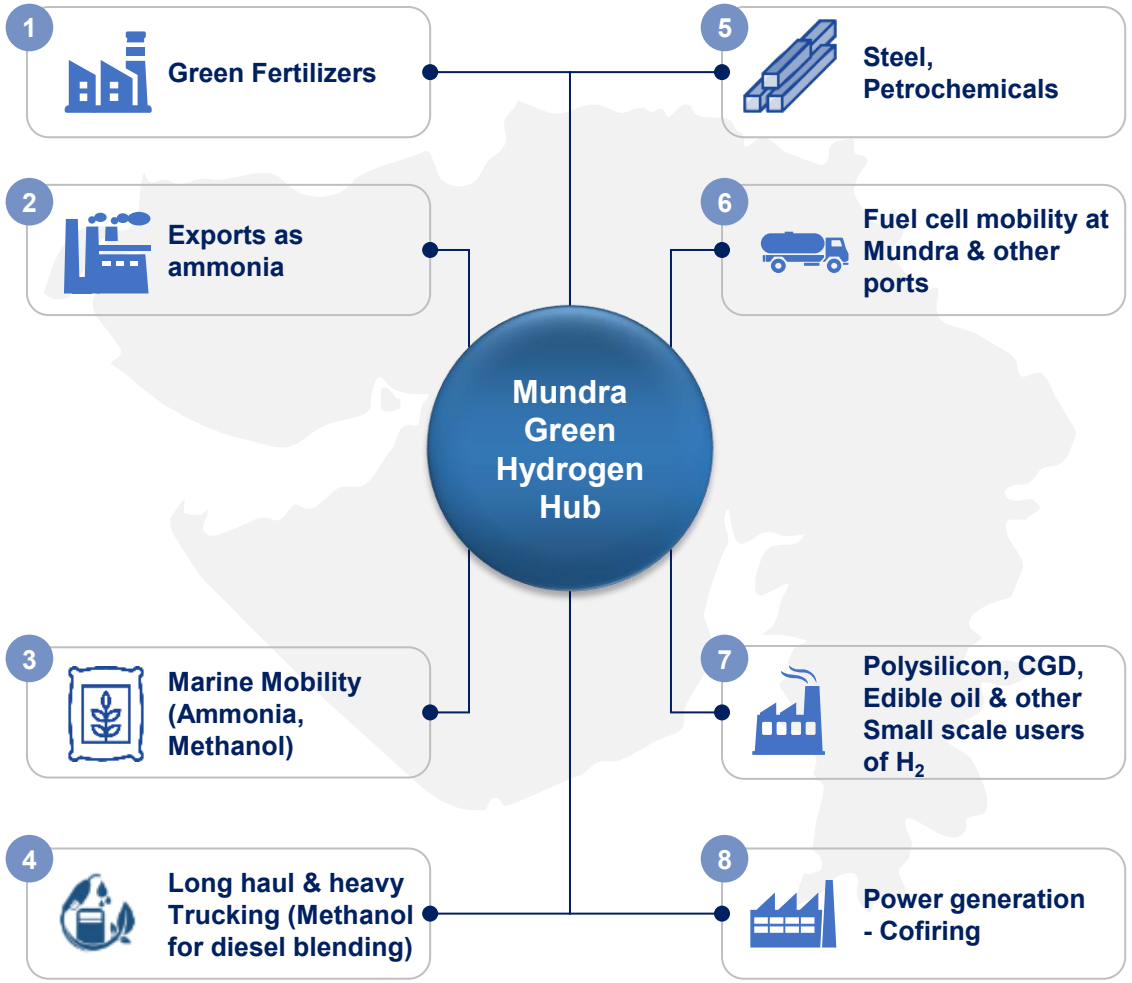

H2: Hydrogen | **LCOE:** Levelized cost of Electricity | **LCOH:** Levelized cost of Hydrogen

ANIL: Setting up the Largest Green Hydrogen Hub in the World at Mundra Gujarat

Full suite of Hydrogen offerings…

RE capacity directly connected	~42 GW
Green Hydrogen	Upto 2.1 MTPA
Green Ammonia + Urea + Methanol	Conversion from GH_2
Hydrogen Compression & Storage	Supporting ecosystem
Other technologies (LH_2, LOHC)	Available as required

… For multiple end uses including substantial captive use in Adani Portfolio businesses …

.. And backed by credible action on ground

Only Hydrogen Hub being developed by a player with

- Renewable and Port infrastructure expertise
- Downstream demand

Backed by ongoing investments

- Polysilicon capacity
- Other processing industries including Copper, PVC and Manufacturing

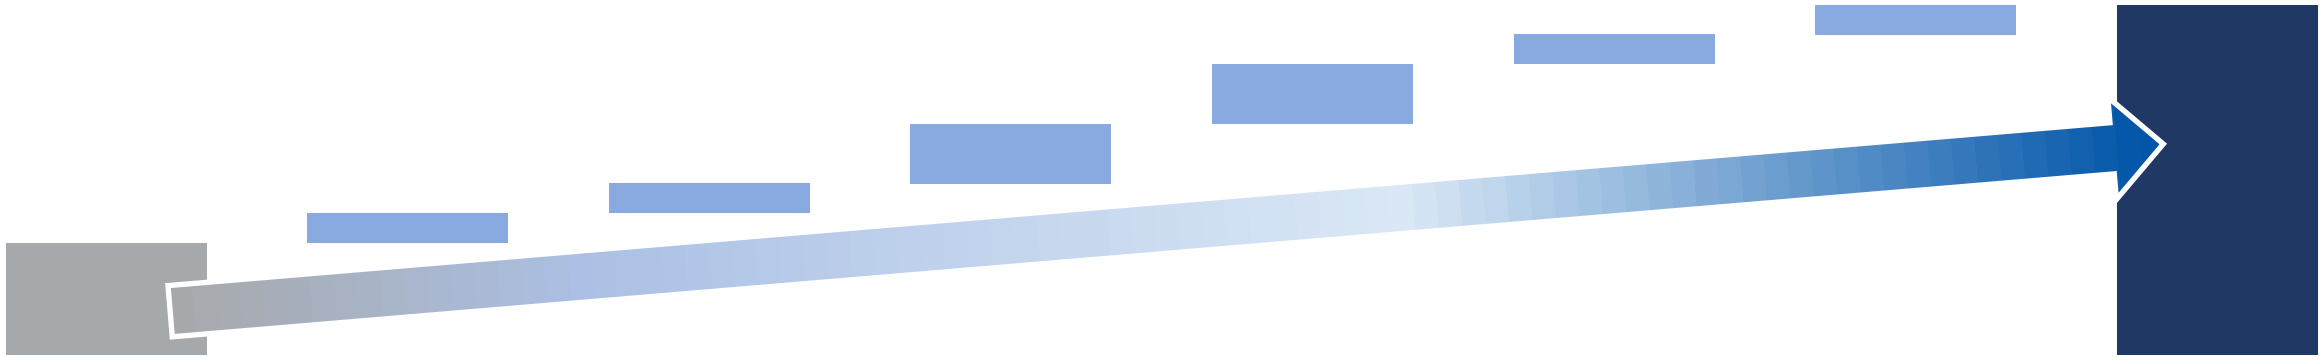

Enabling infrastructure in place

- Logistics network to North India hinterland
- Handling of Methanol / fuels, RE and power
- Demand from edible oil

RE: Renewable Energy | **GW:** Gigawatt | **MTPA:** Million Tons Per Annum | **GH_2:** Green Hydrogen | **LH_2:** Liquid Hydrogen | **H_2:** Hydrogen | **LOHC:** Liquid Organic Hydrogen Carrier | **CGD:** City Gas Distribution | **KTPA:** Kilo Tons Per Annum | **PVC:** Polyvinyl Chloride

ANIL: Building a Premium Platform with Key Competitive Advantages

Key Business Drivers for ANIL and its Competitive Advantage vs. Peers

Replication and Strategic Location	Team and Strategy	Regional and Geographical Support	Cost Advantage	Offtake Advantage	ESG premium	Growth	Premium Platform
Building a platform of ANIL's scale from scratch would require multiple years of experience in the industry Even with sufficient capital, ANIL's strategic geographical plans and expertise is unlikely to be replicated by new players	Ability to leverage the Adani expertise in building and operating energy infrastructure assets across the entire value chain Leveraging partnerships with industry leading technology partners, and analytics driven O&M operations with Artificial Intelligence based tech	Several production linked and capex linked incentives for the Green Hydrogen ecosystem in India Multi modal connectivity and existing supporting infrastructure (especially for renewable power supply)	Green H_2 at c.2x of costs of producing grey H_2, of which a majority c.70-80% consists of input power costs from renewable energy ANIL's green H_2 generation plant is to be located near Adani's c.41GW renewable cluster which is a direct, low cost, renewable energy source	Proximity to end users (captive / external) Addressable market [1] not dependent on exports given size of the H_2 domestic market demand at c.6MTPA Placing ANIL in an advantageous spot vs. competitors dependent on exports e.g. hydrogen hubs in Australia	The urgent need to decarbonise global energy and achieve ESG targets continues to pressure investment momentum in the space Scarce opportunities for investors interested in high growth, green hydrogen platforms	ANIL is not limited to the production of green hydrogen By establishing the world's largest integrated hydrogen hub, ANIL is well placed to serve other markets such as but not limited to green ammonia, green methanol, liquid hydrogen and liquid organic hydrogen carriers	**ANIL justifies a platform premium as it delivers continued growth throughout the value chain**

Critical Components

edgeconnex®

A Large, Global, Private Data Center Operator

Global Data Center Footprint
Customer relationships & contracts
Design & Operations expertise
Hyperscale to Hyperlocal expertise

Product Offerings

Hyperscale campuses: 20+ MW

Large data center campuses in key Indian markets to support major cloud requirements

Build to Suite	Large US Tech Companies
	Flipkart

Hyperlocal campuses: <20 MW

Strategically-placed facilities, creating highly distributed national platform to help bring cloud, content & data closer to businesses & consumers alike

Edge Data Centers (2-20 MW)
Rapidly deliver scalable data center capacity in secondary Edge markets across India

Far Edge Facilities (<2 MW)
Small, modular data centers solutions to support hyperlocal metro requirements

MW: Megawatt | **GW:** Gigawatt | **JV:** Joint Venture

ACX: Market Outlook - Explosive Growth In Digital Infra, AI & Data Localisation

Data Localisation Push

- Data relating to payment systems operated by banks & payment service providers **to be stored only in India**

- Issued a Framework for Adoption of Cloud Services by regulated entities
- Financial sector organization availing SaaS solutions to store critical **data in India**

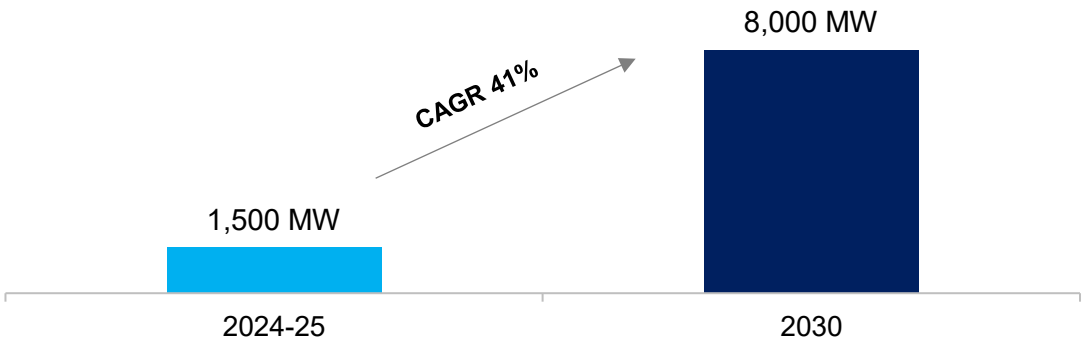

- Data of policies & claim records of insurers to be stored on **systems in India**

- **MCA**: Store books of accounts **in India**
- **MeitY**: Maintain logs and records of financial transactions **within India**

Energy Efficiency & Sustainability as Key Drivers for Investment

Energy Efficiency	– Power cost accounts for **~ 65% of the total operating cost of data centers** – This has made renewable energy a more appealing source of energy to datacenters
Sustainable Investment	– Large companies have committed to having carbon neutrality and are investing heavily in renewable energy projects – Green Data Centers have emerged as a result of stakeholders' demand for **sustainable business practices & lower carbon footprint**

Data Center Capacity in India Undergoing Rapid Growth[1]

Key Growth Drivers and Trends

Increasing Internet Usage: India's rising internet user base, **with 895.8 million subscribers**, highlights the need for enhanced data center capacity amid high mobile data consumption

Technological Advancement: Data centers are crucial for supporting cloud computing, IoT, AI, and big data, driving advanced infrastructure needs

5G Roll-Out: The rise of 5G networks drives increased demand for data centers with enhanced computing, low latency, and cloud-native designs

Primary Industry Business

Copper | PVC | Mining Services

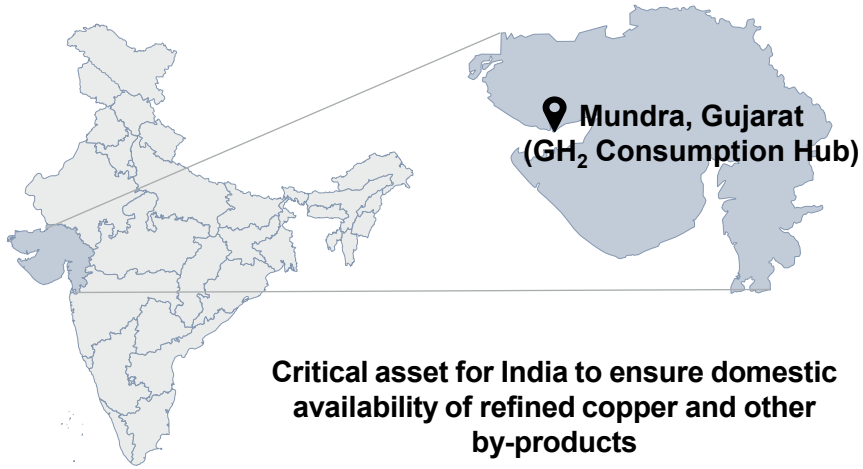

Commercial Mining | Integrated Resource Management

Kutch Copper Limited ("KCL"): Overview

Bridging the supply-demand gap

- Kutch Copper commissioned the first unit of its greenfield copper refinery project with capacity of **500 KTPA** at Mundra in March 2024
- KCL will enable India to successfully **substitute imports** which accounts for **44% of domestic copper consumption**
- With an ability to grow to a capacity of 1 MTPA, KCL will be the world's largest single-location copper smelter
- Demand driven by "***copper super cycle***" driven by electric vehicle demand, transmission wires, smart meters etc.
- During Q4, Copper plant operated at ~45% of annual capacity

Strategically located close to India's largest Port

Critical asset for India to ensure domestic availability of refined copper and other by-products

Key Operating Metrics

500 KTPA
Refined Copper

114.2 KTPA
Production

113.6 KTPA
Sales

India's Copper Supply and Demand Balance

1,001k tonnes	573k tonnes	536k tonnes
Primary Copper Consumption	**Domestic Production**	**Import of Copper**

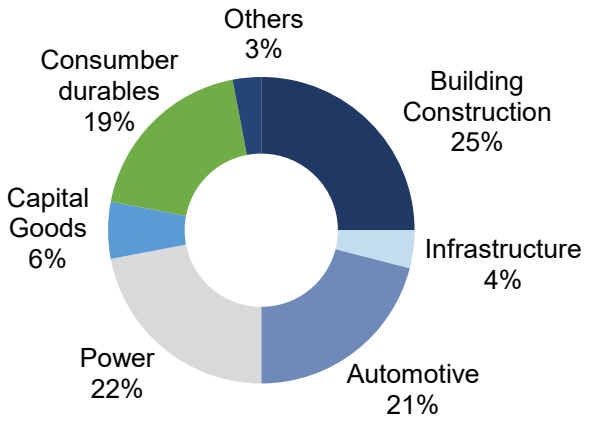

Key Growth Drivers

Strong demand for Metals and Minerals driven by decarbonization, population growth

High acceptability in the fast-growing EV and ancillary industry

Indian Govt. plans to electrify all new vehicles sold in the country by 2030

End-use industry of Copper

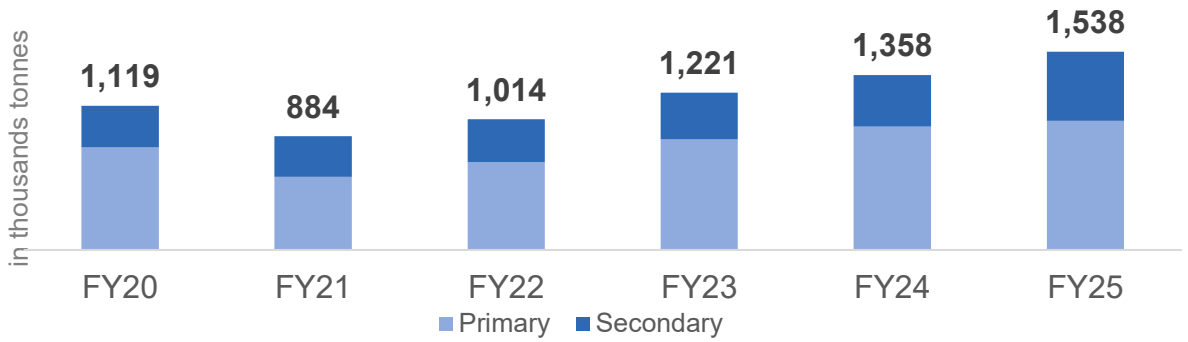

KCL is well positioned to tap the copper supply gap in India with opportunity of export through Mundra

Source: Crisil Report
KTPA: kilotonne per annum | **MTPA:** million tons per year | **SEZ:** Special Economic Zone | **k:** thousand | **TPA:** tonne per annum

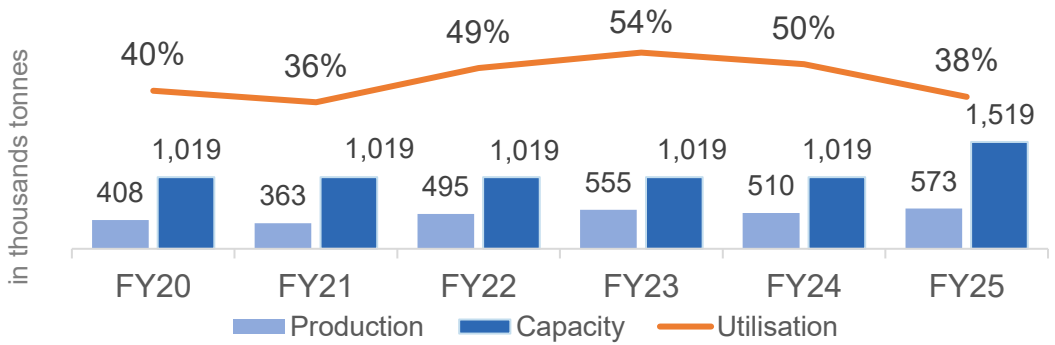

KCL: Market Outlook - Copper as a Critical Metal and its Importance in India

High Levels of Domestic Refined Copper Consumption

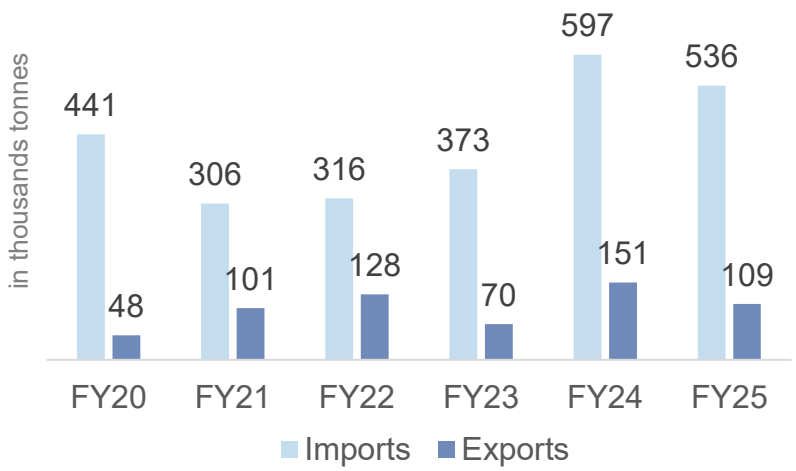

Copper demand grew at a 24.1% CAGR from FY20 to FY25, driven by strong demand in power, consumer durables, and the automobile sectors

Domestic Production of Refined Copper

Domestic Copper production has remained in the 400KT to 600KT range in the last 5 years, compelling the needs for imports

High Surge in Copper Imports

- Lower production of refined copper in India has resulted in a deficit situation in the domestic market
- ***Adani's recently operational KCL Project, will aid the deficit situation***

Impact of India's Ambitious Plans on Copper Market

- **Renewables:** India's ambitious target to achieve 500 GW of renewable energy capacity by 2030, translating into a healthy domestic copper demand
- **Transport:** GoI's plans including investment in the metro rail network and railway electrification are likely to sustain domestic copper demand growth over the next few years
- **Urbanization:** Government focus on housing, smart cities, defense, and EV infrastructure supports a strong copper demand outlook

Mundra Petrochem Limited ("MPL"): Overview

Leveraging synergies for Atmanirbhar Bharat

- MPL is establishing a coal to PVC project at Mundra
- The project will reduce import dependency of PVC, and will promote domestic manufacturing in line with GOI's Atmanirbhar Initiative
- MPL will leverage Adani Group's strong position in resources, logistics, and energy infrastructure
- For this high energy intensive project, power will be sourced from MUL (~38% power from captive RE plant)
- Semi coke will be imported from countries like China, Kazakhstan, Poland & Indonesia
- Project is under construction, financing tied up from Indian banks

Strategically located close to India's largest Port

Critical asset for India to ensure domestic availability of PVC for GOI's Atamnirbhar Initiative

Key Operating Metrics

1 MTPA	38%
Plant Capacity	Power from Renewable Sources

Demand Supply Gap in India

4.8 MTPA	1.7 MTPA
PVC Demand	Domestic Production

Current Status

- Land lease agreement from APSEZL
- Considerable progress in engineering of Offsites and Utilities, VCM & PVC Units
- Construction Water Network Commissioned
- Procurement of Construction power from Mundra Utilities Ltd (MUL).

Key Growth Drivers

- Strong demand from end-user industries – irrigation, water supply, sanitation
- Strong demand for residential real estate
- Adoption of PVC due to their recyclability and lower carbon footprint

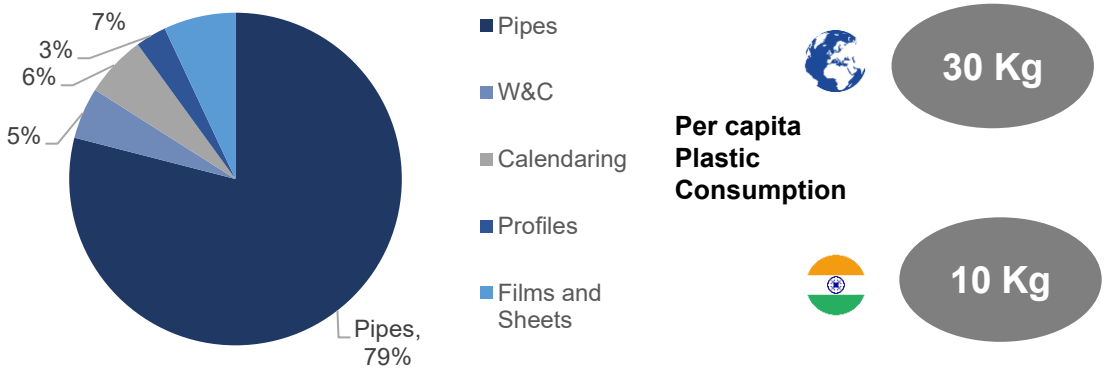

Technology & By-product

Acetylene	Caustic Soda
Routes	By-products

Source: Crisil Report
PVC: Polyvinyl chloride | **GOI:** Government of India | **MTPA:** Million Tonnes per Annum | **MUPL:** Mundra Utilities Pvt Ltd | **PVC:** Polyvinyl Chloride

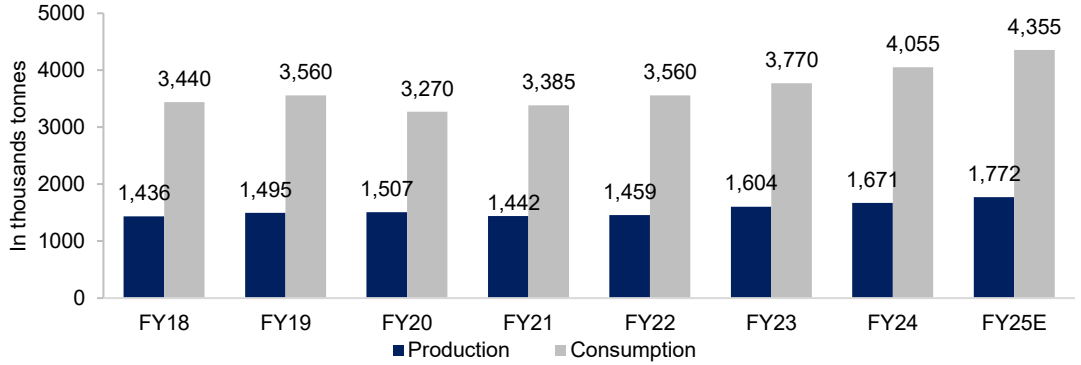

MPL: Make in India push to make India leader in Global PVC Production by 2027

Segment-wise Domestic Demand: an Essential Material

- PVC is widely used in **Agriculture & Irrigation** (pipes), **Building & Construction** (plumbing, wires, windows, floors, doors), **Pharma** (packaging), **Textiles**, **Automotive** and **Power transmission**
- India's per capita plastic consumption is **1/3rd of the world average** → further room for growth as Indian economy grows
- Strong growth outlook in PVC → **8-10% CAGR** in next 8 years

Demand-Supply Gap in India's PVC Production & Consumption[1]

- **India is the largest importer of PVC globally**: High import level due to the rising consumption demand and limited domestic production.
- **Current domestic demand supply gap**: ~2.5 MTPA (Demand: ~4.3 MTPA, Supply: ~1.8 MTPA; Deficit being imported)
- **India is predicted to be the largest producer of PVC by 2027**

Indian Government's initiatives propelling PVC demand

Housing: Government has launched a program focusing on 'housing for everyone', propelling PVC demand for sewage and drainage systems

Jal Jeevan Mission and Swachh Bharat Mission: Government to provide tap water and building community restrooms and individual home restrooms which will further propel PVC demand

AEL: Mining Services – Overview

India's pioneer and largest MDO

- AEL Mining Services is India's pioneer in Mine Development and Operations (MDO)
- AEL currently has eighteen MDO contracts with eleven different customers
- Out of above, seven contracts are already operational with peak capacity of 86.6 MTPA
- Eleven under development services contracts with peak capacity of 59 MTPA
- With current dispatch rate of 34% of total contracted capacity, MDO business is poised for consistent and sustainable growth

MDO contracts across mineral belt

Key Operating Metrics

Key Business Focus Areas

- Maintain market share
- Enhanced volumes as per contracts
- Bid for new services contracts
- Diversify across minerals
- Embedded ESG focus
- Leverage technology for efficient operations

Key Growth Driver

Clear runway of ~66% growth in volumes for operating mines

Achieving production over in under development mines over 2-3 years

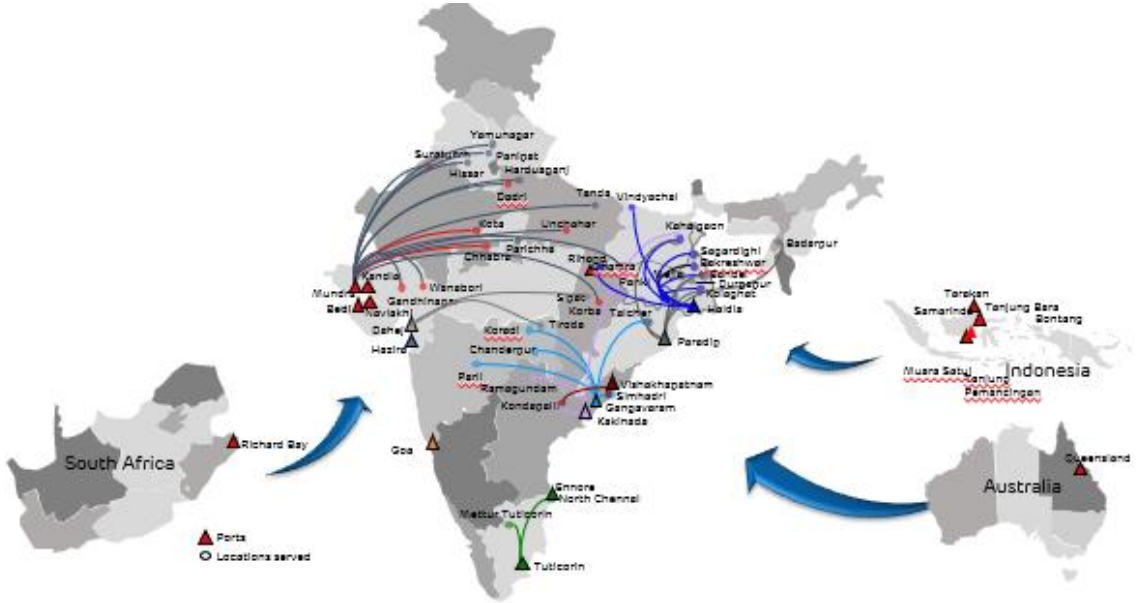

Focusing on new MDO contracts from privatized coal mines

Cr: Crores | **MDO:** Mine Developer and Operator | **EBITDA:** Earning before Interest, Tax Depreciation & Amortization | **MTPA:** Million Tonne Per Annum | **ESG:** Environment, Social & Governance | **PSU:** Public sector undertakings | **UC:** Under Construction | **m:** million

AEL: Integrated Resources Management (IRM) – Overview

IRM logistics network across India with global sourcing footprint

- One of the world's largest end to end logistics provider for coal imports with experience of over 2 decades
- Team of 200+ with global operations run through 20+ India offices, 3 overseas offices
- Management of multi-modal logistics operations pan India and across various ports
- Sourcing relationships with miners in different countries
- Customer clientele includes Asian and other international utilities

Key Business Focus Areas

- Maintain market share
- Complete risk mitigation with 100% hedging
- Diversify customer base across private and sovereign
- Diversify to other minerals like copper, LPG
- Take integrated value chain to customer doorstep
- Leverage technology to improve market reach

Key Growth Driver

- **Sustained high quality coal demand from India's base load power capacity and other industries**
- **Cost plus model with inventory holding capacity**
- **Largest scale of operations in India providing competitive edge**

MTPA: Million Tonne Per Annum | **EBITDA:** Earning before Interest, Tax Depreciation & Amortization | **m:** million

AEL: Commercial Mining – Overview

Overseas Commercial Mining Portfolio

- High quality, in-demand coal from both mines with consistent high rank product throughout the mine life
- Australia Mine is connected with Adani-owned railway line and NQXT port for efficient and confirmed long-term evacuation plan
- Commercial mines' production is supported by AEL's integrated resource management experience and customer network

Annexures

AEL: Best in class industry experts managing AEL Businesses

Key Sponsors

Gautam Adani
Executive Chairman, Adani Group
- *Founder and Chairman of the Adani Group, which ranks among the top 3 industrial portfolio companies in India and consists of 11 publicly listed entities*

Rajesh Adani
MD, Adani Enterprises
- *Vital part of the Adani group since its inception, heading the Group's operations and key in developing its business relationships*

Key Business Line Leaders

Vneet S. Jain
Director, ANIL
- *Nearly 15 years working with the Adani Group, spearheading the Group's strategy for its Energy and Infrastructure business. He has led many first-of-its-kind projects in India, and been instrumental in growing various businesses from conceptualisation to operation - Renewables, Power Generation, Transmission and Distribution*

Vinay Prakash
Director - AEL, CEO - Natural Resources
- *One of the most recognized leaders in the areas of Energy, Infrastructure, Metas & Minerals, propelling AEL's natural resources group to the forefront of growth and excellence. Holds key positions in various industry bodies leading committees of FIMI, ASSOCHAM, FICCI and CII where he championed ideas of responsible and sustainable mining*

Jugeshinder ('Robbie') Singh
CFO, AEL
- *Over 16 years of global investment banking experience in Australia, New Zealand, North America, Europe and Asia*
- *Robbie's experience includes all the aspects of mergers, acquisitions, strategy, finance and risk, with a particular focus on listed and unlisted infrastructure funds*
- *Involved with Adani Group operations as well as managing AEL functions*

Arun Bansal
CEO, Adani Airport Holdings Ltd.
- *Recently joined as CEO of AAHL, helping strengthen its digital transformation and business growth agenda. With over 33 years of experience, he has been instrumental in driving significant share growth in different regions*

Jeyakumar Janakaraj
CEO, AdaniConnex
- *Rich experience of 21 years in the resources industry, building and developing world-class mining projects and resource companies. In 2006, he was awarded the Gold Medal by the Indian Institute of Metals for his contributions to the non-ferrous metallurgical industry*

AEL: Adani Enterprises Limited | **FIMI:** Federation of Indian Mineral Industries | **ASSOCHAM:** Associated Chambers of Commerce & Industry of India | **FICCI:** Federation of Indian Chambers Of Commerce & Industry| **AAHL:** Adani Airport Holdings Limited

AEL: ESG backed by Assurance

Vision

To be a world class leader in businesses that enrich lives and contribute to nations in building infrastructure through sustainable value creation.

Our Key ESG Commitments

- Aim to achieve **No-Net Loss to biodiversity** and align with IBBI/ TNFD principles
- Becoming a **net water positive** company
- Become a signatory to UN Global Compact (UNGC)

- Airport and data center businesses to become operational **net zero by 2029 and 2030 respectively**
- **Creating shared value** for communities through integrated and sustainable development
- Achieve **'zero harm'** through institutionalizing systems, controls and standards

Guiding principles

UNGC	**SDG**	**SBTi**
GRI Standard	**BRSR**	**DJSI**
TCFD	**IBBI/ TNFD**	**CDP**

Policy structure

E
- Climate Change Policy
- Environment Policy
- Energy and Emission Policy
- Water Stewardship Policy
- Biodiversity Policy

S
- Human Rights
- Corporate Social Responsibility Policy
- Occupational Health and Safety Policy

G
- Board Diversity
- Anti-corruption and anti-bribery
- Related Party Transaction Policy

Focus Area

- Climate Action
- Affordable and clean energy
- Clean water and sanitation
- Responsible consumption
- Biodiversity conservation
- No poverty
- Zero hunger
- Good health and well being
- Quality education
- Decent work and economic growth
- Industry, innovation & infrastructure

Policy and ESG Alignment framework backed by robust assurance program

ESG - Environmental, Social & Governance **I UNGC -** United Nations Global Compact **I SDG -** Sustainable Development Goals **I SBTi -** Science Based Targets initiative **I GRI -** Global Reporting Initiative **I BRSR -** Business Responsibility and Sustainability Reporting **I DJSI -** Dow Jones Sustainability Indices **I TCFD -** Task Force on Climate-Related Financial Disclosures **I IBBI -** India Business & Biodiversity Initiative **I TNFD -** Task Force for Nature Related Financial Disclosure **I CDP -** Carbon Disclosure Project

AEL: Adopted UN Sustainable Development Goals

United Nations
Sustainable Development Goals 2030

Women's Education 1. No Poverty 2. Zero Hunger 4. Quality Education	**Multiple Locations**	• Own schools, digitalization and up gradation of Govt. school to provide cost free education to the needy. • Project Suposhan undertaken by Adani Wilmar is successfully continuing its operation.
Women's Health 3. Good Health & Well Being	**Sarguja**	• Partnered with self help group to educate and provide sanitary pads for safe menstrual hygiene to ensure better health.
Women's Empowerment 2. Zero Hunger 5. Gender Equality 8. Decent Work & Economic Growth	**Sarguja & Tamnar**	• Various projects undertaken by Gauri Self help groups for collection and marketing of Non-Timber Forest Produce
Ecology 7. Affordable and Clean Energy 13. Climate Action 14. Life Below Water 15. Life on Land	**Mundra**	• Conservation of mangroves in coordination with GUIDE
Local & Rural Infra Development 9. Industry, Innovation & Infra Structure 11. Sustainable Cities & Communities	**Sarguja**	• Organic Farming and Integrated Multi purpose business model
Water Secure Nation 6. Clean Water and Sanitation	**Multiple Locations**	• Deepening of ponds and tanks, Rooftop Rainwater Harvesting, Recharging Bore wells

Social philosophy drives initiatives that are aligned with UN Sustainable Development Goals

UNSDG – United Nations Sustainable Development Goals

AEL: Strong Governance Framework

Key Items	Key Highlights
Board Independence	✓ 50% Independent Directors
	✓ 12.5% Women Directors
Corporate Responsibility, CSR & Nomination & Remuneration	✓ Corporate Responsibility Committee in place with 100% Independent Directors to provide assurance on ESG aspects
	✓ Corporate Social Responsibility Committee in place with 67% Independent Directors
	✓ Nomination and Remuneration Committee with 100% Independent Directors
Audit Oversight	✓ Audit Committee consisting of 100% Independent Directors (100% non-promoter/ non-executive)
	✓ Statutory Auditors : M/s. Shah Dhandharia & Co. LLP
Risk Management	✓ Risk Management Committee in place with 50% Independent Directors
	✓ Sub-Committees of Risk Management Committee with 67% independent directors: ▪ Mergers & Acquisitions Committee ▪ Legal, Regulatory & Tax Committee ▪ Commodity Price Risk Committee ▪ Reputation Risk Committee
Related Party Transactions	✓ Detailed Policy in place for Related Party Transactions (RPT) to ensure all RPTs are on 'arm's length' basis
	✓ All RPTs are reviewed by the Audit Committee and are duly disclosed in the annual report
	✓ All RPTs beyond statutory thresholds require shareholder approval by way of ordinary resolution
Stakeholders Relationship	✓ Stakeholders Relationship Committee in place with 75% Independent Directors
Anti Corruption and Anti Bribery & Code of Conduct	✓ Anti Corruption and Anti Bribery policy in place with Zero tolerance
	✓ Code Of Conduct for Board Of Directors and Senior Management in place
	✓ Insider Trading Code in Place

ESG Governance Structure

Roles & Responsibilities

- Defining and setting ESG priorities for AEL
- Development of ESG related policies, and procedures
- Support AEL BUs for developing transition plan to become operational net zero
- Capacity Building on ESG for businesses including training
- Submit response to key ESG rating agencies such as DJSI and CDP and develop ESG & BRSR Report.
- ESG target setting and monitoring performance

Roles & Responsibilities of BU ESG Teams

- Create business-level ESG strategy, implementation and monitoring plan.
- Develop decarbonization strategy with an objective to become a Net Zero business
- Manage ESG related compliance obligations.
- Business specific ESG disclosures

AEL: ESG Rating & Performance Highlights

Ratings

S&P Dow Jones Indices	DJSI CSA (2025)	63	**Ranked among the top 4 companies in** its sector globally and placed in the 98th percentile
CDP	CDP - CC (2025)	A	Denotes **"Leadership Category"** indicating AEL dedication and commitment to lowering GHG emissions and their overall environmental impact
CDP	CDP - Water Stewardship (2025)	A	Represents best practice performance, display of environmental leadership through verified progress, and sector-leading action
Sustainalytics	Sustainalytics	35.2	The change in risk categorization (medium to high risk) is due to sector reclassification from T&D[3] to the Conglomerates sector, resulting in a revised peer benchmarking and rating criteria
Transition Pathway Initiative	TPI	Level 3	Denotes "Integrating climate change into operational decision making"
CareEdge ESG Ratings	Care Edge ESG Ratings	83.0	**Categorized in 'Leadership' category** for its ESG performance (a SEBI registered ESG rating agency)
CRISIL	CRISIL	51	**Denotes "Adequate"**, Increase from previous score of 50 (a SEBI registered ESG rating agency)
NSE	NSE	68	**Categorized as 'Aspiring'** for its ESG performance (a SEBI registered agency)

Performance Highlights

ANIL Ecosystem

- **21%** renewable energy in electricity mix
- **100%** water withdrawal from non-competing sources

Data Center

- **59%** renewable energy in electricity mix
- **3** Operational sites achieved Zero Liquid Discharge (ZLD) status

Airports

- **59%** renewable energy in electricity mix
- **12%** reduction in scope 1 & 2 emission intensity[1]

Mining Services

- **28%** reduction in scope 1 & 2 emission intensity[2]
- **4%** reduction in water consumption[2] intensity

AEL

- **99%** of waste managed through reuse, recycle and other recovery operations
- **4,29,622** trees planted in FY26

Achieved in FY26 against FY25 ; **1:** Per million Pax ; **2:** Per ton of ROM (coal + iron ore) ; **3:** Traders and distributors
